

Aishwarya Ankobrao Kalaishekar

Data Analyst

Location: MO, USA | [Mail](#) | Ph :3143252677 | [Linkedin](#)

PROFESSIONAL SUMMARY:

- Over 5 years of experience as a highly accomplished and results-oriented Data Analyst, with a strong foundation in leveraging data analytics to drive impactful outcomes across healthcare and financial domains.
- Proven ability to develop and optimize predictive models, automate complex ETL pipelines, and design insightful data visualizations to support data-driven decision-making.
- Expertise in integrating and standardizing diverse data sources, ensuring data governance and compliance, and applying advanced analytical techniques to extract actionable insights.
- Adept at utilizing a comprehensive suite of technologies including Python, Scikit-learn, SQL, DBT, Apache Airflow, Tableau, Talend, SSIS, Epic, Cerner, Meditech, HIPAA, Apache Spark, PySpark, SparkSQL, Hadoop, FHIR, HL7, ICD-10, CPT, Azure Synapse Analytics, Power BI, A/B Testing, SQL Server Reporting Services (SSRS), AWS, and Agile methodologies.
- Proven track record of improving efficiency, accuracy, and decision-making through innovation, data-driven solutions.

TECHNICAL SKILLS:

Programming Languages:	Python (Pandas, NumPy, Scikit-learn), SQL
Data Processing & ETL:	DBT, Apache Airflow, Talend, SSIS, Hadoop, Apache Spark (PySpark, SparkSQL)
Data Warehousing & Cloud:	Azure Synapse Analytics, AWS (Data Pipelines, Storage)
Data Visualization & Reporting:	Tableau, Power BI, SQL Server Reporting Services (SSRS)
Machine Learning & Analytics:	Supervised Learning, Fraud Detection Models, A/B Testing, Predictive Analytics
Healthcare Data Standards:	FHIR, HL7, ICD, CPT Codes
Database Management:	PostgreSQL, Snowflake
Big Data & Distributed Computing:	Apache Spark, Hadoop
Business Intelligence & KPI Tracking:	Power BI, Tableau, SQL Reporting
Security & Compliance:	HIPAA, Data Anonymization, Encryption Techniques
Agile & Collaboration:	Jira, Agile Methodologies, Scrum
Version Control:	Git, GitHub

EDUCATION:

Master of Computer Science and Information Science - Saint Louis University, MO, USA
Bachelor of Computer Science and Information Science - Visvesvaraya Technological University (VTU), India

CERTIFICATES:

- Python Programming and Network Simulators in association with ISTE, NEW DELHI
- AWS Technical Essentials, Amazon Web Services
- Google Analytics Individual Qualification, Google
- Internet of Things in association with Nano Robotics Embedded Technologies

PROFESSIONAL EXPERIENCE:

Centene Corporation – MO | May 2024 – Present

Data Analyst

- Developed and optimized patient readmission prediction models using Python (Scikit-learn) and SQL, resulting in a 18% reduction in hospital readmissions and improved patient care outcomes.
- Automated complex ETL pipelines with DBT and Apache Airflow, decreasing data processing time by 40% and enabling near real-time reporting for operational and clinical decision-making.
- Designed and deployed interactive Tableau dashboards that enhanced patient outcome tracking and improved operational efficiency by 25%, allowing real-time insights for stakeholders.
- Refactored ETL workflows leveraging DBT, Talend, SSIS, and Airflow, reducing data latency by 35% and improving report generation speed for hospital administrators.
- Integrated and standardized EHR/EMR data from systems like Epic, Cerner, and Meditech with claims data, creating a unified dataset for predictive analytics and performance monitoring.
- Ensured HIPAA compliance and robust data governance by implementing advanced data security protocols, data anonymization, and encryption techniques to protect patient data.
- Utilized Apache Spark (PySpark, Spark SQL) and Hadoop to process and analyze terabytes of healthcare data, enabling efficient data mining for clinical research and operational improvements.

- Developed FHIR and HL7-compliant data pipelines, improving interoperability between healthcare providers and enabling seamless electronic health record (EHR) data exchange.
- Conducted ICD-10 and CPT code analysis to enhance medical billing accuracy, optimize reimbursement rates, and identify potential fraudulent claims, resulting in a 12% reduction in revenue leakage.
- Designed and implemented Azure Synapse Analytics solutions to unify structured and unstructured healthcare data, accelerating complex query performance by 30% and enabling real-time patient risk stratification.

Zensar Technologies - India | April 2019 - Jul 2023

Data Analyst

- Achieved a 30% increase in fraud detection accuracy by deploying advanced supervised machine learning algorithms, specifically tailored for banking transactions, to identify anomalies and reduce false positives.
- Streamlined data processing workflows, resulting in a 40% reduction in data processing time by leveraging Apache Spark and SQL Server Integration Services (SSIS) for efficient data extraction, transformation, and loading.
- Designed and implemented dynamic dashboards in Power BI, which improved reporting efficiency by 25% for stakeholders by providing real-time insights into key performance indicators (KPIs) and financial metrics.
- Executed A/B testing methodologies on credit scoring models, leading to a 15% enhancement in customer segmentation accuracy, thereby enabling more targeted marketing strategies and risk assessments.
- Utilized Python and SQL for comprehensive data cleaning and transformation processes, ensuring high-quality datasets were available for in-depth analysis and reporting.
- Developed automated reporting frameworks using SQL Server Reporting Services (SSRS), significantly improving the efficiency of KPI tracking and reducing manual reporting efforts.
- Conducted extensive data mining activities to uncover trends and patterns within transaction data, providing actionable insights that informed strategic decision-making.
- Oversaw the management of data pipelines within AWS, ensuring data integrity, security, and availability for analytical purposes, while implementing best practices for cloud data management.
- Facilitated regular stakeholder meetings to present project updates, gather feedback, and align data analysis efforts with business objectives, ensuring transparency and collaboration.
- Actively participated in Agile ceremonies, including sprint planning and retrospectives, to enhance team collaboration and improve project delivery timelines in a fast-paced banking environment.
